Creative Brief

Project Title: St. Louis Blues Website

1. Project Overview

The goal of my website is to create an informational site about the St. Louis Blues that explores the team's history, achievements, and identity. Beyond presenting facts and statistics, I want the site to capture the energy and culture surrounding the team and its connection to the city of St. Louis.

2. Resources

Copy is available at https://en.wikipedia.org/wiki/St._Louis_Blues as well as some photography. There are a lot of other photographs of artworks available on Google Images as well.

4. Audience

This is primarily an informational and educational website rather than a commercial site. The audience may include St. Louis Blues fans, hockey fans, and people from St. Louis who want to learn more about the team.

5. Message

I dont think the website necessarily has a message it wants to portray. I do want to communicate the identity and vibes of the St. Louis Blues as a team

6. Tone

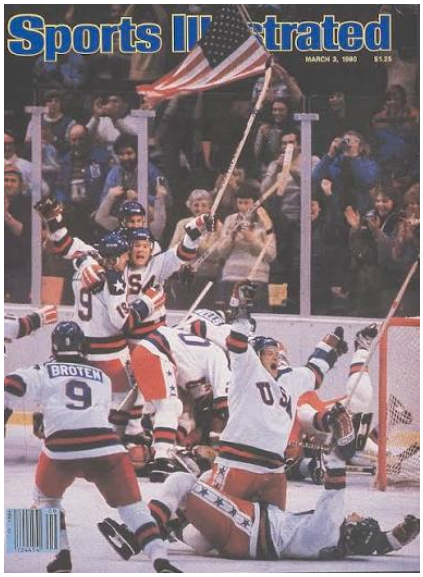

The tone should feel energetic, bold, and confident, reflecting the atmosphere of a hockey game.

8. Visual Style

My visual direction will be inspired by the St. Louis Blues' blue and gold colors, hockey graphics, and the visual language of sports branding. I want to use bold typography, strong contrast, and large photography to create a layout that feels connected to the energy of the sport. I also want to use as much imagery as possible and avoid very large blocks of text. I want the website to feel recognizable as a St. Louis Blues site while still having its own creative identity.
